# OZREN OUTDOOR - PARAGLAJING NA OZRENU *paragliding at Ozren*

Ozren ima izuzetan potencijal za jedrenje paraglajderom a posebno u proljeće i ljeto kada termička strujanja koja vode do baze oblaka dostižu visinu i preko 2.500 m, što omogućava jedrenje koje često traje i po nekoliko sati, sa dužinom preleta od više desetina kilometara. Paraglajding klub "ParaGhost" koristi kao osnovnu infrastrukturu uređena poletišta na Ozrenu: platformu za iskusnije letače na Gostilju kao i tri uređena poletišta na koti Ruj. Ova uređena poletišta se kombinuju tokom godine obzirom da je letenje sa Gostilja najbolje u proljeće i ljeto, dok je za kotu Ruj najbolje letiti u jesen i zimu što je velika prednost letenja na Ozrenu.

*Ozren mountain has exceptionally good potential for paragliding, especially during the spring and summer, when thermals lift to the cloud base, all the way up to 2,500 m or even higher, which allows gliding that lasts up to several hours, with the possibility to overfly the distance of several tenths of kilometers. Paragliding club "ParaGhost" uses launch sites on two locations, one for more experienced gliders on Gostilj and three sites suitable for everyone at the elevation Ruj as its basic flying infrastructure. Those launch sites are combined throughout the year since flying from Gostilj is the best during the spring and summer while Ruj is the best during autumn and winter. That is one more advantage of using Ozren for paragliding activities.*
